GI Balloon Dilatation Catheter Series 

LePuffer™ Single-use Balloon Dilatation Catheter Progressive Dilation Balloons

Used to dilate strictures of the biliary duct and the alimentary tract.

• Excellent Deliverability

- Soft and tapered tip allows less invasive advancement across the stricture.
- Low-profile design reduces resistance and increases crossability and trackability.

• Operational Efficiency

- Facilitate placement within tight strictures and tortuous anatomy.
- Optimized balloon deflation time.

• Optimized Balloon Design

- The balloon component is designed to offer stability during stricture dilation.
- Semi-compliant material engineered to adapt to biliary duct.

Specifications

	REF	Balloon			Catherer			Minimum Working Channel (mm)
		Length (mm)	Diam. (mm)	Nominal Pressure (atm)	Length (cm)	Diam. (mm)	Structure	
Pyloric and Biliary	KZ0630E0	30	6-7-8	3-4.5-6	180	2	OTW	2.8
